Address1	AMMADAYA COLONY,MANSOORABAD,	Address2	L B NAGAR	City	HYDERABAD DIST
AdmitDate	18-Mar-2021 1:29:42 PM	DisgDate	21-Mar-2021 4:42:38 PM		
Doctor Name	DR. G DHANRAJ MD,DCH	Ref.Doctor Name	MAHENDER REDDY dch		

Diagnosis

K56.1 Ileo-Colic Intussusception

Laparoscopic + Reduction of Intussusception done under GA

Case History

A 2 years 7 months old male child (Wt : 12kgs) was brought with history of abdominal pain since 3 days intermittent. O/E : Child is conscious, afebrile, PR: 103/min, pulses well felt, BP: 103/66mmhg, RR: 20/min, CVS : s1s2+, RS : bil AE+, clear, SPO2: 99% in RA, P/A : soft, no organomegaly, Bs+, CNS : NAD, no focal deficit, Pupils - NSRL.

Course in Hospital

Child was admitted with above mentioned complaints and necessary investigations were done. Child was started on IV fluids, IV antibiotics and other supportive care. USG abdomen done suggestive of short segment bowel within bowel appearance noted in right hypochondriac region- suggestive of intussusception. Pediatric surgeon opinion taken, parents were counselled in detail and advised surgery.

Procedure Done : Laparoscopy + Reduction of Intussusception done under GA on 18.03.2021. Intra operative findings include : 1. Ileo-colic intussusception, 2. No evidence of ischaemia of intussuscepted bowel.

Postoperative care is uneventful and hospital stay was stable. Child activity and vitals monitored. Child observed for 1 day. Child general condition improved, no fever spikes, urine output good, accepting feeds well. Child was hemodynamically stable, hence is being discharged with following advice.

Treatment Given

IV Fluids
Inj Taxim
Inj Metrogyl
Inj Pantop
Monitoring Vitals and Other Supportive Care

Advice At Discharge

1. Inj Metrogyl 27ml IV twice daily for 4 days
2. Inj Taxim 600mg IV twice daily for 4 days (dilute in 15ml of NS over 1/2 hour)

Suture removal after 7 days

Review with Dr N Bhuvaneshwar Rao (Pediatric Surgeon) after 7 days at opd

Review with Dr G Dhanraj at opd after 7 days

To followup regularly with Dr Mahender Reddy at clinic

Review if any danger signs like any pus discharge / bleeding, swelling, redness over site, high-grade fever spikes, vomitings, pain abdomen, abdominal distension, at emergency (ER) doctor in our hospital / local pediatrician. If any emergency reasons, please contact : 040-40108108, Extn No. 300.

I, father/mother/attendant of Mast V Kalyan Ram, am aware of the treatment given and the advice post discharge is explained to me in my own language I understand, I am also told the need for followup at appropriate time.
